

**Results of the PhD Programme in Inclusive and Sustainable Development over the last five years**

<b>DENOMINACIÓN</b>	<b>2022/23</b>	<b>2023/24</b>				
Number of places offered	20	20				
Number of newly enrolled doctoral candidates	13	9				
Total number of enrolled doctoral candidates	46	45				
Percentage of international students enrolled with respect to the total	54,35	55,56				
Percentage of students enrolled in the research line Poverty, inclusion, territory and cooperation	30,43	35,35				
Percentage of students enrolled in the research line Governance, human and fundamental rights for the construction of inclusive and sustainable societies	26,08	28,88				
Percentage of students enrolled in the research line Business capabilities, economic growth and development	43,47	37,77				
Number of academic staff in the Programme	31	31				
Number of ongoing competitive research projects	-	12				
Number of doctoral theses defended	5	3				
Percentage of programme members supervising doctoral theses	25	20				
Percentage of theses awarded cum laude	40	66,67				
Percentage of theses with international mention	50	33,33				
Number of relevant scientific contributions derived from defended theses	11	4				
Average duration of the full-time doctoral programme	4	4				
Three-year success rate from initial enrolment	8,33	0				
Average duration of the part-time doctoral programme	4	4				
Thesis completion rate	72,72	75,73				
Dropout rate	55,56	61,11				
Percentage of students who have participated in international mobility programmes		8,88				
Results of doctoral candidates' satisfaction with the training received	3.32	*				
Results of doctoral candidates' satisfaction with the Programme	4.14	*				

Doctoral candidates' satisfaction with mobility programmes	3.63	*				
Doctoral candidates' satisfaction with supervisory functions	4.64	*				
Doctoral candidates' satisfaction with tutoring functions	4.73	*				
Overall satisfaction results of academic staff/researchers with the PhD Programme	4.29	4,67				

The evaluation is recorded on a scale of five, with five being the maximum score.

\* No data could be collected, as the minimum required response sample size to obtain a result was not reached.
